1 Abstract

So far it seems like the best variables to use might be the ones from the `spending` table, `readmissionReduction`, `timelyCare`, `readmission`, `complications`, and `ambulatorySurgical`.

2 Methods

(see Economic Research Division 2010)

(see n.d.)

3 Results

FieldName	CompleteCases	PercentComplete
State	3143	100.00
County	3143	100.00
Low access, seniors age 65, at 1,2 mile, number	3143	100.00
Low access, seniors age 65, at 1,2 mile, share	3143	100.00
Low access, seniors age 65, at 1 mile, number	3143	100.00
Low access, seniors age 65, at 1 mile, share	3143	100.00
Low access, seniors age 65, at 10 miles, number	3143	100.00
Low access, seniors age 65, at 10 miles, share	3143	100.00
Low access, seniors age 65, at 20 miles, number	3143	100.00
Low access, seniors age 65, at 20 miles, share	3143	100.00
